Greg (781)-540-2361

Hello Amazing Campers! Today, we will climb the infamous Mt. Monadnock! Yes, the rumors are true - we did not climb Mt. Monadnock for the past 2 years, because of the consecutive storms, and we did go to a port museum and skyzone, hence our trip last wednesday. The mountain has two trails - the white dot (O) and white cross (☒) trail. It is about 3,165 ft high, and the mountain is surrounded by thousands of acres of protected highlands. The summit is dominated by different sub-alpine species such as mountain ash, cotton grass, and sheep laurel. The summit is very rocky too, and is fun to climb. Are y'all ready?!

-plz don't rain!

If your child is going to be absent, please email director.esp@newtonenvisci.org before 8:30 the morning before. Thank you

In case of an emergency, your child will be brought to Newton-Wellesley Hospital (683-424-7191). This program must comply with the regulations of the MA Dept. of Health and must be licensed to the City of Newton Health Dept.
